Kubernetes Docker Sonobuoy Operators

Git and Github Web-Development

Golang Java Python Javascript HTML/CSS

1. CNCF (Cloud Native Computing Foundation)/ GSoC (Google Summer of Code) Mentee

In my GSoC internship for the CNCF organization I am working on a **Kubebuilder** plugin (deploy-image plugin) which helps in making an **Operator** solution for Kubernetes users to **deploy an image** on the cluster.

<https://github.com/kubernetes-sigs/kubebuilder/tree/master/pkg/plugins/golang/deploy-image/v1alpha1>

2. Kubernetes and Kubernetes-Sigs / Open Source Contributor

I am a member of **Kubernetes** and **Kubernetes-Sigs** organizations on **Github** which work on Kubernetes and related cloud native projects. I am constantly looking for issues where I can help and make an impact in maintaining the project.

Pull requests merged in **Kubernetes org** projects: **total 22**

<https://github.com/pulls?q=is%3Apr+author%3ANikhilSharmaWe+archived%3Afalse+is%3Amerged+user%3Akubernetes>

Pull requests merged in **Kubernetes Sigs org** projects: **total 17**

<https://github.com/pulls?q=is%3Apr+author%3ANikhilSharmaWe+archived%3Afalse+is%3Amerged+user%3Akubernetes-sigs>

3. vmware-tanzu / Open Source Contributor

I have been also contributing to sonobuoy which is a diagnostic tool that helps in understanding the state of your **Kubernetes cluster** through running conformance tests and other plugins. In the repository, I have worked on adding a [new flag for adding new configurations for permissions](#). Also worked on [adding documentation](#) to the project's github repository and official website.

Pull requests **merged** in **vmware-tanzu/sonobuoy**: total 3
<https://github.com/pulls?q=is%3Apr+author%3ANikhilSharmaWe+archived%3Afalse+is%3Amerged+user%3Avmware-tanzu>
